## MATERIAL SAFETY DATA SHEET

### (PURE TIN AND 60%) TIN PAINT (100%Sn; 60 TIN(Sn) & 40 Pb )

---

#### 1. Product Identification

This is applicable to the following product :Pure Tin Paint and 60% Tin Paint

#### 2. Composition/ Information on Ingredients

##### Ingredients Name - %

|                    |           |
|--------------------|-----------|
| Pure Tin 100-99.8% | 0.05mg/m3 |
| Lead 30- 40        | 0.05mg/m3 |
| Tin -60-70         | 2.0mg/m3  |
| Halides            |           |
| Hydroxide          |           |
| Thickening agent   |           |

#### 3. Hazards Identification

Emergency Overview: Severe Eye irritant  
Toxic by inhalation  
Gastrointestinal Tract irritant  
Moderate Respiratory Tract irritant  
Causes Skin irritation

Eye Hazards Eye contact with these products in finely-divided form may cause irritation and/ or conjunctivitis but not likely to permanently injure eye tissue.

#### Skin Hazards

Skin contact with these products in finely-divided form may cause irritation and/ or dermatitis.

#### Ingestion Hazards

Ingestion of these products in finely-divided forms may cause nausea, vomiting, diarrhoea and gastrointestinal irritation. Long term chronic ingestion may damage the liver, kidneys, nervous system, gastrointestinal system.

**Do not** induce vomiting. Call a physician. **NOTE TO PHYSICIAN**- No specific antidote. Supportive care. Treatment based on judgement of the physician in response to reactions of patient.

#### Inhalation Hazards

Inhalation can cause Moderate respiratory irritation, dizziness, weakness, fatigue, nausea, and headache. May cause respiratory tract sensitization, characterised by Asthma-like symptoms. If symptoms of overexposure are experienced, evacuate to fresh air. If symptoms persist, seek medical attention.

Carcinogenicity: None of the substances in this product are confirmed as human carcinogens at this time by NTP, IARC or OSHA. (IARC classifies Lead and some lead compounds as 2B carcinogens to Humans) AGCIH lists as Lead as a “A3, (animal carcinogen with unknown relevance to humans).

Reproduction: No data available to indicate product or any components present at greater than 0.1% may cause birth defects. Women of child bearing age should avoid exposure to Lead and its inorganic compounds due to post-natal effects.

Mutagenicity: No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.

#### 4. First Aid Measures

##### Eye

Flush affected areas with water for at least 20 minutes. Seek medical assistance if necessary.

### Skin

Remove contaminated clothing. Wash affected area with large quantities of water for at least five minutes. Seek medical assistance if necessary.

### Ingestion

If subject is conscious, induce vomiting. If unconscious or convulsive, seek immediate medical assistance.

### Inhalation

If signs and symptoms of toxicity are observed, remove subject from area, administer oxygen, and seek medical attention. Keep the subject warm and at rest. Perform cardiac pulmonary resuscitation (CPU) if breathing has stopped.

## 5. Fire Fighting Measures

### Fire And Explosion Hazards

These products may react vigorously or ignite when exposed to flame and/ or incompatible materials (see section #6). If present in a fire or explosion they will emit fumes of the constituent metals and/ or metal oxides.

### Extinguishing Media

Use dry powder. Do not use water.

### Fire Fighting Instructions

If fighting a fire in which these products are present, wear a self-contained breathing apparatus with full face piece operated in pressure-demand or other positive pressure mode.

### Hazardous Combustion Products:

Carbon monoxide; carbon dioxide; metal fumes; toxic fumes.

## 6. Accidental Release Measures

If a finely-divided form of product is spilled, clean up spillage so as to minimise dispersion of dust. Wet sweeping or vacuuming using HEPA filtration is recommended.

## 7. Handling And Storage

### Handling And Storage Precautions

Do not store in proximity to incompatible materials

### Work/Hygienic Practices

To minimise the possibility of ingestion, wash hands and face before eating, drinking, applying cosmetics, or using tobacco.

## 8. Exposure Controls/Personal Protection

### Engineering Controls

Use appropriate ventilation (e.g., dilution, local exhaust) adequate to maintain concentrations of all components and their decomposition by-products to within their respective OSHA, SABS or other applicable standards.

### Eye/Face Protection

Wear eye protection adequate to prevent eye contact with the finely-divided forms of product and eye injury from the hazards of soldering. Plastic-frame spectacles with side shields and filter lenses (shade #3 or #4) are recommended.

### Skin Protection

Wear appropriate protective gloves and clothing to prevent skin injuries from the hazards of soldering and/or for prolonged or repeated contact with finely-divided forms of product. Avoid flammable fabrics.

### Respiratory Protection

If an exposure level exceeds an OSHA, SABS or other applicable standard, use a NIOSH-approved respirator having a configuration (class, type of facepiece, filter media, assigned protection factor, etc.) appropriate to the concentration of the contaminant (s) generated. For guidance on selection and use of respiratory protection, consult American National Standard Z88.2 (ANSI, New York, NY 10036usa).

## 9. Physical and Chemical Properties

### Appearance

A clear liquid with powder segregating and settling to the base (when mixed it forms a grey cream)

Melting range: 183-232 degrees C

Solubility: Insoluble

## 10. Stability And Reactivity

Stability: Stable

#### 4. Road traffic safety rules.

##### 16. Additional Information
